RATIFICATION IMPOSSIBLE

By U. S. Senate, Says Republican Leader

After the President Makes Stand Known.

Washington, Jan. 8.—Senator Lodge, of Massachusetts, the Republican leader, declared in a statement tonight that he feared President Wilson's Jackson Day message had made impossible "that in the Senate we might have come together and ratified the treaty proposed by the principle set forth in the fourteen resolutions."

"The President has made his position very plain," said the Senator. "He rejects absolutely the reservations adopted by a decisive majority of the Senate. He says we must take the treaty without any change which alters its meaning, or leave it. He will permit interpretation, whatever that may mean, expressing his un-

in the Monroe yard, and were caught by the M. C. R. police, Capt. Carl D. J. Morrison and W. C. Whittington. Each one was fined \$50 and costs and had to make restitution to the M. C. R. for name stolen.

Uses for Viscose.

By converting cellulose, one of the elements of wood, into a gelatinous material known as viscose, a wide field is opened up for the utilization of wood waste and a new line of products, varying all the way from man-made paper to tapestry, is added to the already lengthy list.

QUAKE ROUSES QUIET VOLCANO

Apparently Extinct One in Mexico is Raging Now.

Not Less Than 300 Deaths From Lava.

Mexico City, Jan. 8.—A violent volcanic eruption has been caused by the recent earthquake near Cordoba, where Cerezo de San Miguel, a small and apparently extinct volcano, has been burst again. The new crater is throwing out smoke, ash and flame, while lava is flooding the nearby territories in a stream more than 200 yards wide, resulting in no less than 300 deaths.

Despatches from Vera Cruz today give some details of the catastrophe. Every nearby settlement in this district has been levelled. Score of worshippers in the churches at Abuluxila and Tresa were buried beneath the ruins. Great gaps in the earth appeared at San Francisco de la Penas, San Carlos and Aguilera.

Vera Cruz confirms the earlier report that the village of Tabasco was completely destroyed.

Tried to Kill

CORK EX-SHERIFF

Cork, Jan. 8.—Sir Alfred Dobbin, who was High Sheriff of the City of Cork in 1906, had a narrow escape from death or serious injury today, when he was fired upon by an unknown man as he was leaving his residence. The bullet grazed his forehead, and did not harm him.

Sir Alfred Dobbin is best remembered for his fight against James Larkin, the Irish strike leader, and the transport workers.

Money Banked Is Money Saved---Money Spent Is Money Gone

It looked like a commonplace wedding, but it had an unusual ending. The bride and groom, both of whom were pronounced man and wife when there was a common understanding and in the presence of the witnesses, were to be the world like an inmate parent on the trail of dope. He brandished an order signed by the Turkish Government, threatening the immediate return of his wife.

"I paid 250 dollars!" he thundered. "Give her back at once! I want my money back. I want her! What of that?"

"I have two, but this woman also is mine! Return her to me!"

The British officials who had come to the wedding read that finders were keepers in this instance, and that there was no order of the Turkish Government, was a piece of paper.

"Then my 250!" pleaded the Turk.

"It goes to the young couple, you must set up housekeeping," the British voted the official heartlessly.

THE REASON WHY

WHY DOES A LAMP GIVE A BET-
TER LIGHT WITH THE CHIM-
NEY ON?

When a lamp is burning without a chimney it generally smokes. That is because the oil which is coming up through the wick is being only partially burned. The carbon, which is about one-half of what the oil contains, is not being burned in the flame, goes off with the oil, and settles in the glass in little black spots with the gases which are blown off. The reason the carbon is not burned when the chimney is off is that there is not sufficient oxygen from the air combining with it, as it is separated from the air. The air is separated from the oil by the glass. The flame is going on. To make the carbon in the oil burn you must mix it with plenty of oxygen as at certain temperature, and this can only be done by forcing sufficient oxygen through the flame to bring the carbon to the flame. When the chimney is on the carbon will combine with it and burn. When you put the chimney on the

lamp you create a draft which forces more oxygen through the flame and brings the heat up to the proper temperature and the heat is more penetrating and it is more efficient. When you take the chimney off again the heat goes down, when the draft is shut off the heat goes down.

The chimney also protects the flames from the draft coming from the sides of the lamp from drafts from the sides and above, and helps to make the flame more efficient. The light is brighter than a flickering one.

The draft created by the chimneys causes the burning of the fuel to be more efficient, oil up and away from the flame. Some of these gases have a tendency to put out a light or a fire.

DOES LIGHT WEIGHT AFFECT THE DRAFT?

To get the answer to this question we must go back to the definition of light. Light is a wave in the ether and contains no particles of matter and therefore it does not weigh anything at all.

When men had studied light thor-

oughly, however, they came to the conclusion that it must have the power of pressure, which, from the strange position of the results, would amount to the same thing as having weight. The reason for this was that the light shone on one side of the balance and the balance tilted and let sunlight shine down on one of the sides, of the balance. The pressure of light. In their first experiments along this line men failed to get any results, but when they tilted the side of the balance on which the light shone did go down, but by continuing to tilt it they found that eventually that the light did exert a sufficient pressure to cause the scales to tip. This was the first time that light was found to have weight; but this was found to be a common property of all light, and therefore, do not speak of this quality as weight, but as the pressure of light.

(From "The Book of Wonders of Science," copyrighted and published by Barnes & Noble, Education, Washington, D.C.)

Wigwag - That fellow Pizarro was a good one. He was a real sharp guy.

-Hub- What has water got to do with spending money?

Murray Angle has gone to Hamilton where he has secured a job as fireman.

Mr. and Mrs. Thomas Simmons and daughter, Mrs. Bert Harvard, of Welland, spent New Year's at Thomas Gimmons's home. They were accompanied by Mrs. Angle, who brought the Leamon Miller farm, near York.

Mr. and Mrs. Harrington spent New Year's at the home of Mrs. Angle.

A very pretty event was solemnized on New Year's Day at the home of Mrs. Angle, when their second daughter, Margaret, was united in marriage to Mr. Albert J. Hennepy, Morrisburg, Ont. The ceremony was conducted by Rev. J. J. O'Connell, pastor of the St. Ignace church. The bride was dressed in navy blue taffeta and carried white and pink roses. The bridesmaid also wore navy blue taffeta and carried red roses. Mr. Karl T. Hennepy, of Morrisburg, was the best man.

After the ceremony, the guests, numbering about thirty-five, were treated to a delicious and sumptuous dinner was served. The presents were many and costly.

ter spending a week at the bride's parents, Mr. and Mrs. Humphrey have agreed to return to their home in Chicago followed by the good wishes of their friends.

Had a Return Ticket.

When Mr. Fairwight came to town on a visit he discovered many things that he could not do at home. He found that you could walk for a whole hour without striking a fire or an automobile. He also found that a policeman couldn't hit a policeman simply because he compels you to move out of his way.

As he was being taken to the station, he inquired what the policeman intended to do with him.

"Never mind. You'll find out soon enough," said the policeman, grimly.

"What?"

"At seven days." Ah, that's where I have, ye, old blue-bottle!" chuckled Mr. Fairwight, trippingly, pointing to his pocket. "I've got a return ticket. I've got to go back on Monday."

The man who is too busy to be a man.

You never can tell. Many a man with a watchful eye is mighty dumb.

**INCREASE TO
TEACHERS
PASSED UPON**

Carried Without Comment
By the Board of Edu-
cation.

ABOUT VACCINATION

**This Matter Being Taken
Up With the Board of
Health.**

Without any comment whatever, the Board of Education last night settled the increase to the women teachers of the public schools by approving the recommendation of the Internal Management Committee. Trustees Linger and Callaghan moved the adoption of the latter recommendation and the committee reported without any one objecting. The vote was 12 to 0 in favor of the increase. It was stated that the increase of \$100 per year would be given to the women teachers. There was some objection to this at first, but the women pointed out that the trustees had no superannuation fund to fall back upon when their days of usefulness would end and they, therefore, would be given an increase equal to that given the teachers. The board approved. This settled the salary matter for 1920 at any rate.

K. H. Foster, secretary, made a welcome announcement. When he assured the board that while the books for 1919 were not closed yet, the department would get the year with a substantial surplus on hand. When asked to approximate the amount, Mr. Foster said about four of the thousand dollars.

On motion of Trustees Allan and Hutchinson, Dr. T. S. McGillivray was appointed the board's representative on the Public Library Board for the coming year.

Chairman Lister, Trustee Allan and Secretary Foster will wait on Dr. James Roberts with a view to having the smaller regulations relating to school children vaccinated shall be able to return to school immediately after instead of being forced to remain at home for three days. Principal Turner reported that 600 pupils at the Collegiate Institute had been obliged to remain at home owing to not having been vaccinated. Just whether the teachers would have to be vaccinated as well was uncertain, but Mr. Foster said it would depend on the Collegiate authorities. He said if the teachers took up the matter of vaccination, he would be taking up with the provincial health authorities.

W. Clarke on behalf of the trustees of the Collegiate Institute, wrote, thanking the members of the board for the money that had been given them. "While the amount was not what had been asked for, it was very grateful, but hoped that in due course the board would see to it that they could give them the increase originally applied for, as they had asked for that figure when the money was given. The note was filed without comment."

Miss Lillian O'Connell applied for leave of absence for three months. Miss M. Alice Berlet applied for re-employment as a school nurse. The staff of the Collegiate Institute, including a household science teacher, A. D. MacIntosh, a school principal, and Miss Georgia Sutherland, Maitland, for position as teacher. These communications were referred to the Internal Management Committee.

A communication was received from T. H. Haydon, of the Home Guard title Association, thanking the board for the splendid cooperation it had always extended to the association, and requesting it to accept a set of flags and instruments for the school cadets, and also the rifle range fittings in the various schools, which the association used when the war was on. The board accepted these gifts very graciously.

The young women household science teachers of Ottawa, Misses Sifton and Currie, will be engaged at a salary of \$1,000 a year to come to the city and teach. There is still a shortage of household science teachers, and Secretary Foster thought the board would avail itself of the opportunity of obtaining the services of these young women.

Chairman Lister welcomed to the board Trustee Alex. MacFarlane, who was present last night for the first time as successor to J. A. Cunningham. Collegiate trustee, who moved to Welland to reside. Mr. MacFarlane replied that it was a great honor to him to become a member of the board.

At the conclusion of the meeting Trustee J. Orr Callaghan referred very feelingly to the services of Chairman Lister during the year.

"There are those of us who remember the yeoman service Mr. Lister's father gave this board, and I am pleased to say that his son has done just as well. It is not often one sees a father and son who are so devoted for the one position, and I have much pleasure in moving our chairman a hearty vote of thanks," said Trustee Callaghan. The motion was adopted unanimously. Chairman Lister responded by saying he was a pleasure for him to have so served, and he was glad to know that he had given such satisfaction.

**BOLSHEVIKI
STILL GAINING**

London, Jan. 3.—Bolshevik cavalry has captured the town of Berdiansk, on the north shore of the Sea of Azov, one of the most excellent ports on the sea.

A Moscow wireless says the capture of Berdiansk gives the Bolsheviks mastery of the Sea of Azov, and means the definite surrender of the forces of Gen. Denikin, the anti-Bolshevik leader in South Russia.

The dispatch adds that the Reds are anticipating their advance.

BANDIT GANG IN TORONTO ROUNDED UP

Run Down by Officers After An Exciting Gun Chase.

HAMILTON MAN

In Party, and Hamilton Auto Alleged to Be Used.

Toronto, Jan. 8.—At least one of the hold-up gangs which have terrorized Toronto for the past month came to grief last night, when, after a chase in motor cars and afoot, and amid the rain of flying bullets, Frank Brake, aged 18, no home, was arrested on a charge of attempting to rob a citizen at Teraslay and Dundas Streets; and Philip Gammali and Tony Pappelo, both of Markham Street, North, Hamilton, were taken into custody on charges of vagrancy by four plucky Toronto officers: P. C. Naylor, Byrd, Foster and Detective-Sergeant Cronin. The automobile in which the alleged bandits operated was a high-powered Allen, brought from Hamilton, the police allege, by the gang.

The attempted robbery at Teraslay and Dundas Streets occurred about 10.20. At the time Sergt. S. H. Martin, then on duty at the dock in West Dundas Police station, was engaged in examining one William Green, who had been brought in on a charge of shoplifting. It being alleged that he had entered the tailoring establishment of Crawford and Sons, 215 Young Street, with intent to steal.

Suddenly, in the midst of the examination, Olinton Delano, an Italian, 201 Jarvis Street, rushed into the station, and cried out to the sergeant and constables within that he and a friend, Pollett, at the same address, had been held up by three men at the corner of Dundas and Teraslay Streets.

Sergt. Martin immediately cried to Naylor and Byrd, who had captured Green: "Get out, quick; there's a hold-up at Teraslay and Dundas!" The two constables rushed out of the station. At the corner they saw three men. Seeing the policemen the three men, after a wild look around for a means of escape, separated. Brake ran south along Teraslay Street, the others headed north on the same thoroughfare. Naylor followed Brake, Byrd pursued the other two.

"Brake ran south on Teraslay Street, on the west side of the street," said Naylor, in relating the story. "I took after him, calling meanwhile for him to stop. He refused to stop. Whipping out my gun as I ran, I fired a shot in the air, hoping thereby to make him halt. Instead, he kept on. At Albert and Teraslay I again fired at him, this time twice. Still he refused to halt."

"Turning west on Albert Street he headed toward Elizabeth Street, some citizens saw him, and I called to them to stop Brake. Brake brandished a revolver, and the people fled to cover. Nearing Elizabeth Street Brake slackened speed. He was tiring. I was pretty well winded myself. He halted dead opposite a board fence, and lifted his arm threw his gun over the fence. He then dropped exhausted against the fence, and I took him into custody."

Byrd in the meantime had followed Brake's companions east along Dundas Street to Yonge. The men then headed north to Gerrard Street, west on Gerrard Street, south on Teraslay Street, to Elm Street, where Byrd caught up with them. They were exhausted, and incapable of fight or flight; Byrd took them into custody and marched them a sorry-looking pair, to the station.

While Byrd and Naylor were out chasing their men, Sergt. Martin communicated with detective headquarters. All the men on duty there instantly responded. Police cars were quickly placed in commission, and after a wild hunt Detective-Sergt. Cronin came upon Gurno, seated at the wheel of his car, on Elm Street, apparently awaiting the return of his comrades.

PRINCE TO VISIT RANCH THIS FALL

Calgary, Jan. 8.—The Prince of Wales is determined to visit his ranch in Alberta during the coming fall on his way back from India. He sold Prof. Carlisle, of Calgary, who has just returned from England, where he made arrangements for the shipment to the ranch of thoroughbred Dartmoor ponies, which the Prince is introducing to Alberta, also thoroughbred Shorthorn cattle and Shropshire sheep. The name of the ranch has been fixed by the Prince as "The E. P. Ranch." Prof. Carlisle, who is manager of the George Lake ranches, will also manage the Prince's ranch.

RECORD WHEAT PRICE.

Chicago, Jan. 8.—The highest price on record was paid here to-day for a June No. 1 spring wheat for milling purposes. The consignment, shipped from an Illinois point, brought the unprecedented price of \$1.49 a bushel. Flour also took an unexpected jump, selling at \$14.25 a barrel, as compared with \$14.85 a week ago. This presages an advance in the price of bread.

Velvet Gold and Sequins in Favor for Evening

Last of the Slavers and Old Slave Mart

Although slave running was placed in the same legal category with piracy by Congress in 1867, it continued for twenty years or more to be followed by adventures. The last of the slave trade, the first of the civil war destroyed forever the last profitable market for African negroes. It was in New York as a prize in the hands of the United States Navy. The last of the slave trade, the first of the civil war destroyed forever the last profitable market for African negroes. It was in New York as a prize in the hands of the United States Navy. VALUES IT MORE THAN A FORTUNE
Power Gains Eighteen Pounds—Rheumatism Disappears After Taking Tanlac.
"I consider what Tanlac has done for me to be worth more than a fortune," said George Power, of Halifax, N. S., while talking to the Tanlac representative a few days ago. Mr. Power, who is 30½ years old, is a tall, well-built man, and has lived in Nova Scotia all his life and is a well-known employee of the Nova Scotia Trust and Power Co.

Future Bright For National Railways
Completion of the first year in the life of the Canadian National Railways, says Mr. D. B. Hanna, in the annual financial report of the Toronto Globe, is an important milestone on the road of transportation progress. The year was a glow for our hands to we might not look back but the careful analysis of the year still shows a hand on the wheel, and should look back now and then to the year of the first year of the railway world, therefore, can justify a certain amount of retrospection.

The year's progress, however, of course been affected by the fact that 1919 was the first year of the readjustment period following the cessation of hostilities. Apart from the movement of returning troops, the most immediate effect of the war was a falling off in traffic in war time. The year's progress, however, of course been affected by the fact that 1919 was the first year of the readjustment period following the cessation of hostilities. Apart from the movement of returning troops, the most immediate effect of the war was a falling off in traffic in war time.

As one stands in the silence, in the dampness of mould and decay, he is unconsciously visualizing the life of long ago yesterday. Now suddenly he feels, disturbed by the past, the life of long ago yesterday. Now suddenly he feels, disturbed by the past, the life of long ago yesterday. Now suddenly he feels, disturbed by the past, the life of long ago yesterday.

TALC MINI NG AT MADOC.
In the upper pictures are shown the first open out of the Henderson Talc mine and miners working 500 feet underground in one of the shafts, which shows plainly the white talc. Below is the grinding mill, where it is prepared to for commercial use.
